

Data Center Security 6.7 Product Matrix

Security monitoring and hardening for the heterogeneous data center.

Quick Reference: Security Management

This table provides an overview of the key features offered by the Symantec Data Center Security products. For more information, refer to the Symantec Data Center Security: Server Advanced Product Guide.

Features/Capabilities	DCS: Server	DCS: Monitoring Edition	DCS: Server Advanced
Agentless anti-malware protection	YES	YES*	YES*
Agentless network threat protection	YES	YES*	YES*
Autodeployment and provisioning of security virtual application to VMware hosts	YES	YES*	YES*
Operations Director: Automation and orchestration of security policies for workloads across Symantec and third-party tools (e.g., Palo Alto Networks)	YES	YES*	YES*
Does not require VMware NSX		YES	YES
Integration with Symantec File Reputation Insight services	YES	YES*	YES*
Security microsegmentation of virtual workloads (eg. per Zero-trust model)	YES**		YES***
Key compliance controls (e.g., PCI, NIST, HIPAA)	YES	YES	YES
Web browser protection	YES	YES	YES
Real-time file integrity monitoring		YES	YES
File and system integrity monitoring		YES	YES
Security configuration monitoring		YES	YES
Security monitoring of on-premise physical workloads		YES	YES
Security monitoring of on-premise virtual workloads		YES	YES
Security monitoring of cloud- AWS & OpenStack (all modules)		YES	YES
Out-of-the-box host intrusion detection policies (IDS)		YES	YES
Log inspection and consolidated event logging		YES	YES
Supports Docker container environments			YES
Security microsegmentation of physical workloads (eg. per Zero-trust model)			YES
Virtual patching			YES
Out-of-the-box host intrusion prevention policies			YES
File and system tamper prevention			YES
Security hardening of on-premise physical and virtual workloads			YES
Security hardening of OpenStack Keystone			YES
Application and device control			YES
Host-based firewall			YES
Compensating host intrusion prevention controls			YES
<p>Notes:</p> <p>* Customers with DCS: Monitoring Edition and Server Advanced licenses will have entitlement to the DCS: Server capabilities. However, these components will require that customers also have VMware NSX deployed in their environments.</p> <p>**Customers of DCS: Server leverage the integration of Operations Director with VMware vCenter and VMware NSX Service Composer to automate and orchestrate security across Symantec and third-party security tools.</p> <p>***Customers of DCS: Server Advanced can leverage the integration of vCenter and Operations Director to enable microsegmentation.</p> <p>****DCS: Monitoring Edition and Server Advanced do not require VMware NSX.</p>
